DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Non-elected claims 1-38 and 41-45 remain. The prosecution of this case is closed except for consideration of the above matter.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

Claims 39-40 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record teaches a liquid crystal display device comprising: a first substrate on which a first electrode and a bus line for transmitting a signal to the first electrode are formed; a second substrate on which a second electrode is formed; domain defining projections provided on one of the first substrate and the second substrate; a plurality of domain defining slits provided on the electrode on the other of the first substrate and the second substrate to be aligned on a straight line; and liquid crystal sealed between the first substrate and the second substrate and having negative dielectric anisotropy. The prior art of record does not teach nor suggest, in combination with the limitations supra, a width of a bus line opposite side end of a first slit of the plurality of slits, that is positioned closest to the bus line, is set smaller than a width of a bus line side end of a second slit positioned adjacent to the first slit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
